

With the support of  
the Erasmus+ programme  
of the European Union

## DigiMaths Project Event 31st August

### Erasmus+ Maximising the opportunities presented by digital technologies in numeracy teaching

**What?** A free blended webinar to present the findings of the Erasmus+ DigiMaths project.

Learn about:

- our traffic light model for assessing whether digital teaching methods and learning resources truly add value to numeracy and maths learning
- the free training course, guidance and resources that are on a dedicated website
- the project, its methodology and what we learned through a survey and literature review

**When?** 10:30 to 12:00 (UK time), Thursday, 31<sup>st</sup> August 2017

**Where?** Glasgow, Scotland and online via Google Hangout – partial travel bursaries might be available if you want to travel in person

**Who?** Aimed at:

- teachers of maths/numeracy to children, young people and adults
- researchers, education managers and policy makers

**Why?** Because you will be able to:

- increase your knowledge and understanding of the role of digital technologies in teaching numeracy and maths
- improve your skills at identifying the best uses of digital technologies
- find out how to improve the skills and knowledge of your colleagues

**How?** Find out more by emailing [Jackie Howie](mailto:jhowie@learninglinkscotland.org.uk) at [jhowie@learninglinkscotland.org.uk](mailto:jhowie@learninglinkscotland.org.uk)
