---

## Our Objectives:

**Develop novel solutions for using and sharing urban big data**

**Provide high quality training and outreach activities**

**Deliver cutting-edge research**

@UrbanBigData

urbanbigdata

Urban  
Big  
Data  
Centre

An ESRC Data  
Investment

- **What makes data big?**

- Volume, Velocity, Variety....
- Verification & Value
- Existing large/ complex datasets
- Online, real time, social media data, videos
- The 'internet of things' (e.g. computer chip/ sensor data).

# Integrated Multimedia City Data (iMCD) Project

- Lead Investigator:  
Vonu Thakuriah
- Co-Investigators:  
Mike Osborne  
Gwilym Pryce  
Zhenhong Li  
Jinhyun Hong  
Mark Livingston  
Iadh Ounis  
Joemon Jose  
Craig McDonald

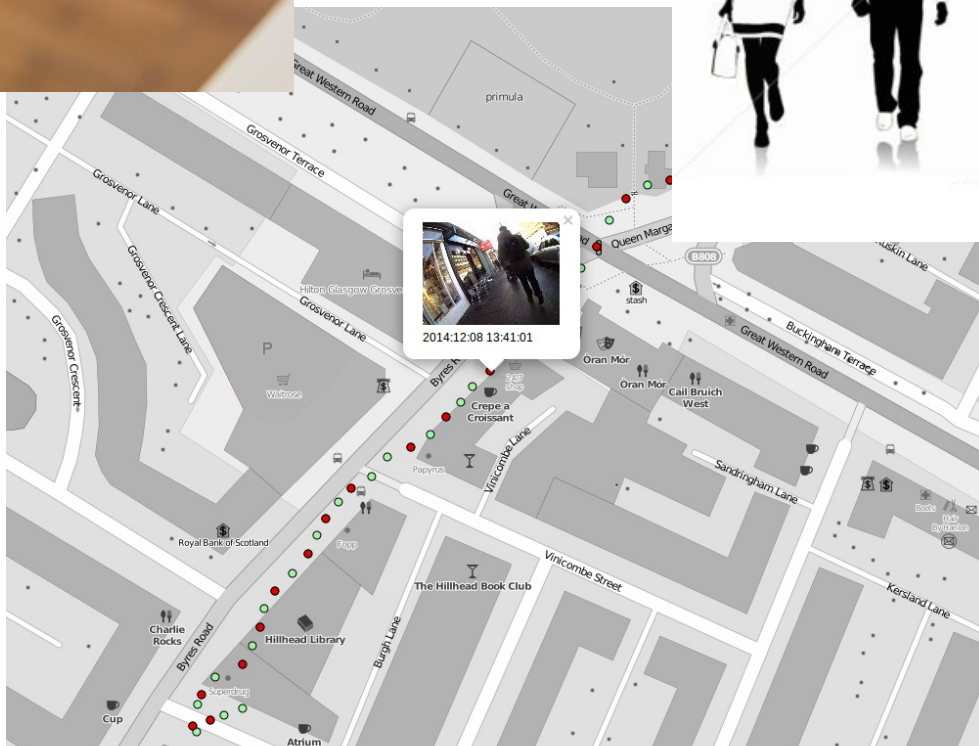

- Integrated Multi-media City Data Project
- 1600 Household Survey
- GPS data
- Life logging and sensing data
- Glasgow Memory server (social media capture)

# GPS

# Lifeloggers

# Survey measures

- Individual & household demographics
- Attitudes, values
- Literacy/ knowledge
- Behaviours in 5 domains:
  - **Sustainability**
  - **Transport**
  - **Education/ skills**
  - **Cultural/ civic activities**
  - **ICT/ technology**
- Explicit Link to UNESCO  
Key Features of Learning Cities

# Adult Education Emphasis

- Qualifications, Skills, Activity, Attitudes
  - Formal Learning
  - Informal Learning
  - Non-formal Learning
  - Family Learning
- Literacies - English, Foreign Language, Maths & Financial, Health, Environmental

# The case of adult learners

- Sub-samples of learning engaged and non-engaged adults, migrants and older adults.
- How are they engaging and why?
- Analysis of demographics, sustainability, political/ cultural, housing and transport variables for predictors of lifelong learning
- Where are engaged learners going (where are they based)?
- What are they seeing? Doing (inside & outside learning environments)?

# Sample

# Engagement

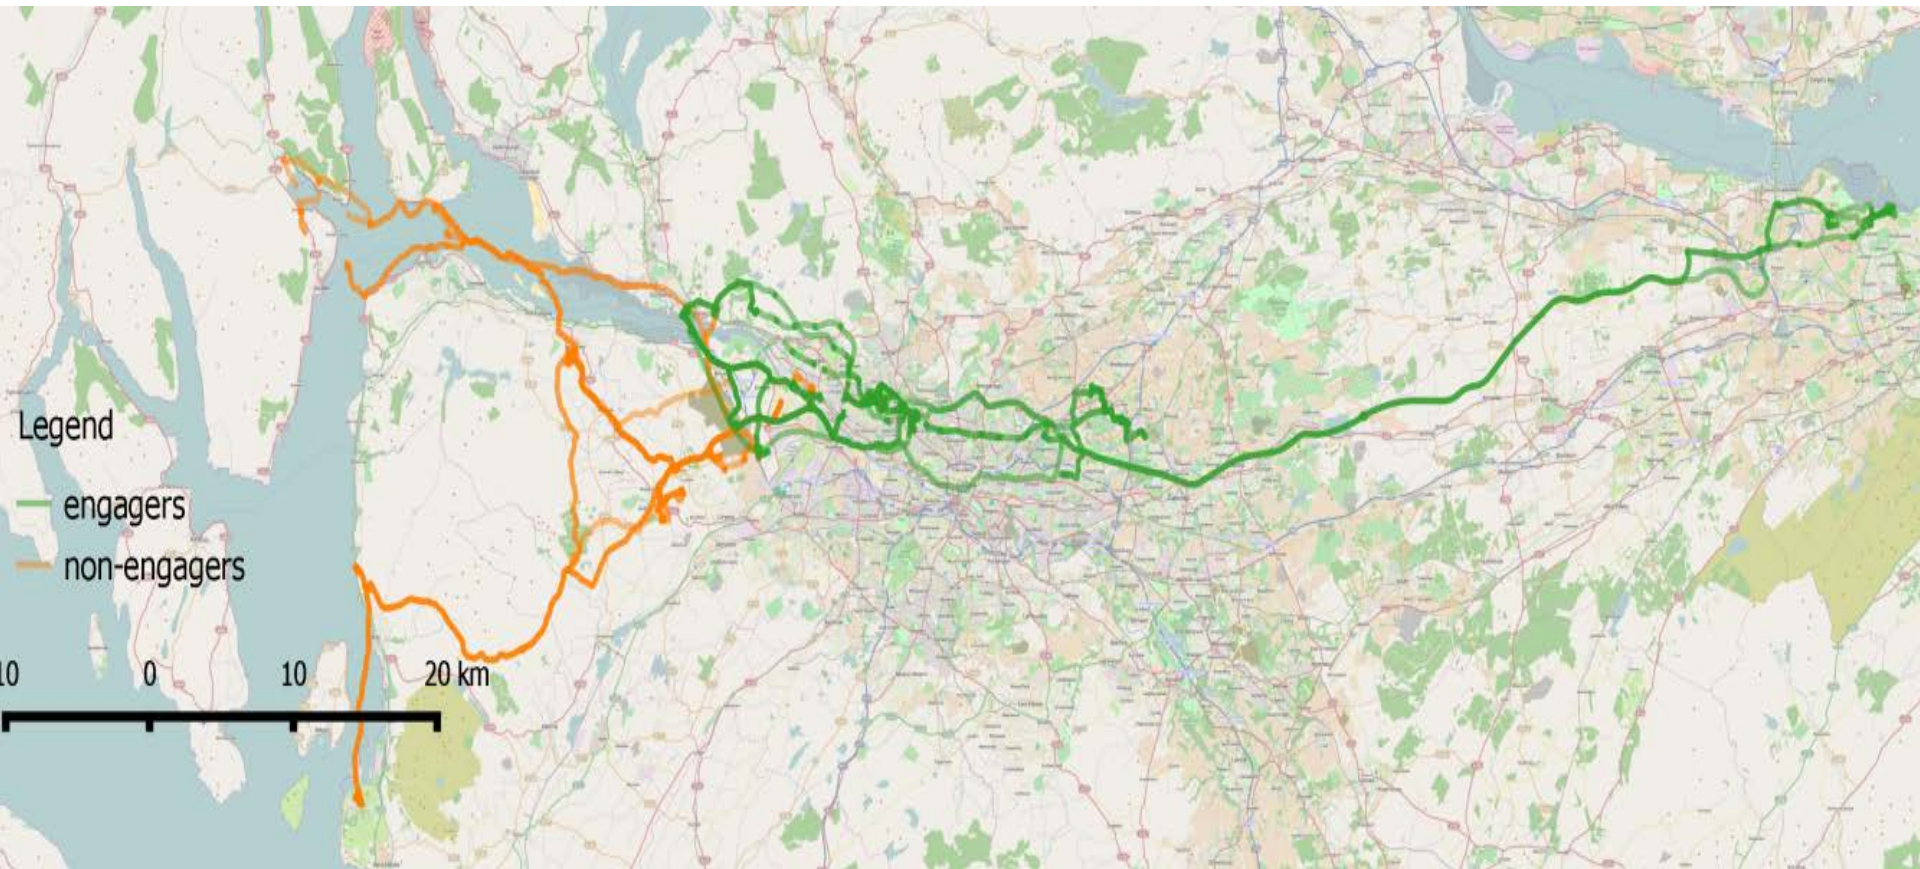

# Predictors

- Age
  - Older people participate less in all forms of learning
- Health
  - Those reporting better health participate more
- Planning to move
  - Those who planned to move were more likely to engage in learning activities
- Feeling Safe
- Belonging

# Learning engaged and matched non-engaged older adults travel across Scotland

# Learning engagement and other engagement

- 46 engaged 60+ adults (12.2% of sample of 377)
- Also more engaged in cultural, civic, online and physical activities within the city and beyond
- Actively aging older learners report
  - more positive health
  - more likely to be working and caring for others
  - participating in online social engagement and boycotts

# Policy Implications

- Digital Competence
- Health
- Safety
- Belonging

# Neighbourhoods, housing & Educational opportunity

- Unequal educational outcomes
  - Social Class
  - Poverty
- Policy Problem
  - Social mobility and social justice
  - Available skills to economy
  - Hourglass Labour Market
  - Immune to successive education reforms

# Aims

- School-level educational outcomes and links with geographic place, neighbourhood space, school choice and transport in and around Glasgow
- Links between schools' performance, and neighbourhood indicators with VET, HE and participation in lifelong learning (formal, informal and non-formal learning)

# Schools and Place

- *Places affect schools*
- *Schools affect Places*

# Datasets

- Administrative data drawn from pupil, school and teacher census records
- UCAS (Universities and Colleges Admissions Service) Data
- HESA (Higher Education Statistical Agency) Data
- iMCD

# Anticipated Outcomes

- Create predictive models of successful lifelong learners, with successful economic outcomes (income and employment), by geographic location, neighbourhood satisfaction, deprivation and school indicators.
- Examine where significant cohort effects occur for educational and economic success by postcode/school locations across Glasgow.
- Provide a model representing the extent to which housing and school choice drives (or countervails) inequity in school and individual lifelong learning outcomes.

# Emerging Research Areas

- *The relationship between financial and household literacies, attitudes and behaviours*
- *Neighbourhood effects (deprivation and diversity) on migrants' spatial mobility*
- *Social identity in social media as it is shaped by terrorist events*
- *Political literacies, civic engagement and online discourse.*
- *Community lived experience of deprivation*
- *The impact of government policy change and political events (referendum and elections) on education-related tweets*
