Quality Education Symposium 2016 in Vladivostok

„Quality Education and Sustainability“

Organized by: Far Eastern Federal University (FEFU),
School of Engineering

Co-hosted by: Asian Network for Quality (ANQ);
website: <http://www.anq2016.org/en-us/program/program/>

Synopsis: Quality education will become a huge challenge of the new UN Sustainable Development Goals until 2030.

In 2016 FEFU integrate the Quality Education Symposium into the International Scientific Conference “Modern technologies and the development of polytechnic education”. This conference, which is held by FEFU with the participation of representatives of three TEMPUS projects, will take place on the campus of FEFU in Vladivostok. We are delighted that we could, in cooperation with the organization committee of this conference, place a specific session about quality management. Thus the Sustainable Development Goal **Quality Education** will be translated into action even more intensively and see a direct further development in cooperation with the education sector.

The Quality Education Symposium will not only provide a panel discussion. Still another session will make it possible also to draw up scientific papers about **Quality Education**. This will particularly be done before the background of the topic of the Scientific Conference, “Modern technologies and the development of polytechnic education” (see the conference website: <https://www.dvfu.ru/schools/engineering/PolyTech-2016>).

Date: Thursday, September 22, 2016
