

CR&DALL Seminar Series 2023-24: Carbon Capture (Use) and Storage – what does it mean for sociocultural research, landscapes and lives?

Organiser: Anna Wilson, School of Education, University of Glasgow

Date: Monday 29th January 2024, 13:00-15:00

Location: Room 237B, Advanced Research Centre, University of Glasgow, 11 Chapel Lane Glasgow G11 6EW

Are you interested in the sociocultural implications of Carbon Capture (Use) and Storage (CC(U)S) technologies, or decarbonisation technologies more generally?

Are you researching, or thinking about researching (with) people and places where landscapes and lives might be touched by decarbonisation technologies?

If so, come along to this session to share and explore ideas and understandings in a novel and enjoyable way. You may find new collaborators or new ideas for research, as well as new ways of thinking about CC(U)S itself.

All are welcome – whether interested in CC(U)S in itself or in related research, and whether you are a student or a professor.

Register: <https://www.eventbrite.co.uk/e/carbon-capture-use-and-storage-seminar-tickets-795995332467>

This event is co-hosted by the Sustainability Interdisciplinary Research Theme in the University of Glasgow's College of Social Sciences. It is connected with the CC(U)S Futures project, sponsored by the EPSRC through the Industrial Decarbonisation Research and Innovation Centre. There is no fee for this event.
