

Transforming Education for Sustainable Futures (TESF)

TESF GLOBAL LEGACY EVENT

Transforming education for sustainable futures requires reimagining the futures of education together.

What is transformative education and how does it look from the Global South?
How can co-engaged research advance a new social contract for education?

Join us as we speak to these two critical dimensions of contemporary educational policy, and as we give meaning to policy in and through practice by sharing key insights and outputs gained from the TESF network.
